## RAVLT Scoring Sheet page 2

Word List for Testing RAVLT Recognition

| Calculation | Score |
| :--- | :--- |
| AC=sum of \# correct for List A | $\mathrm{AC}=$ |
| BC=sum of \# correct for List B | $\mathrm{BC}=$ |
| SA=\# from A list attributed to B | $\mathrm{SA}=$ |
| $\mathrm{SB}=$ \# from B list attributed to A | $\mathrm{SB}=$ |
| $\mathrm{Al}=$ \# of N words falsely recognized as from list A | $\mathrm{Al}=$ |
| $\mathrm{BI}=$ \# of $N$ words falsely recognized as from list B | $\mathrm{Bl}=$ |

| Calculation | Score |
| :--- | :--- |
| TA $=$ AC+SA-AI | TA $=$ |
| TB=BC+SB-BI | TB= |
| T (Total Recall) $=$ TA + TB | T $=$ |
| S (Source Errors) $=$ SA+SB | S= |
| TAC (Total Accurate Recall) $=$ T-S | TAC $=$ |

## Notes:

## Tactual Formboard Test Score Form

To Accompany "Neuropsychological Assessment of Adults with Visual Impairment" By John T. Gallagher Ed.D. \& Katherine Burnham B.S.

Examinee:
Examiner:

Highest Grade Completed
Examinee Age:

Date/Time:

INSTRUCTIONS FOR THE EXAMINER: Administer the Tactual Formboard Test to the examinee according to directions given in the Appendix of the Neuropsychological Assessment of Adults with Visual-impairment. Record the following in each of the columns.

1) For each Trial, record $Y$ (Yes) or $N(N o)$ if examinee was able to place all of the shapes within the 8 minute time limit.
2) If examinee was not able to complete within the 8 minutes, record the total Number of Blocks Placed successfully.
3) Record the Time to Completion. If examinee did not complete, record " 480 seconds".
4) Circle the shapes that were correctly placed.
5) Record the time taken for the examinee to first begin to explore the back row (the row furthest from the examinee), such as by feeling the outline of the indented shapes in this row or beginning to try fit the shapes into the indentations, or if the top outline of the board is explored.
6) Record the time taken from the beginning of the trial to the placement of the second block.
7) For Memory Trials Memory Score, circle any shape that was correctly identified. For Memory Trials Location Score, only circle the correctly placed shapes
8) Record Observational Data in the Observational Data table below, circling the appropriate description for each category

## Shape Placement

620 Wheat Lane, Wood Dale, IL 60191 USA • www.StoeltingCo.com • (800) 860-9775 • Psychtests@StoeltingCo.com
Forms reproducible with purchase of "Neuropsychological Assessment of Adults with Visual-impairment"

## Auditory Cancellation Test

To Accompany "Neuropsychological Assessment Of Adults With Visual Impairment" By John T. Gallagher Ed.D. \& Katherine Burnham B.S.

Examinee:
Examiner:
Highest Grade Completed
Examinee Age:
Date/Time:

## Directions

1. Read verbal directions from manual to examinee to introduce subtests
2. Circle each "A" that the examinee misses; put a line through "As" correctly tapped
3. Circle each other letter for which the examinee incorrectly taps
4. Record the number of "A" letters that were not tapped as Omission Errors below
5. Record the number of letters that were tapped incorrectly as Commission Errors below

## Commission Errors

## Omission Errors

## Haptic Subtests

Occupation: Date:

Summary

| Subtest | Raw Score | Scaled Score(from Table V.2) |
| :--- | :--- | :--- |
| Digit Symbol |  |  |
| Block Design |  |  |
| Object Assembly |  |  |
| Pattern Board |  |  |

## I. Digit Symbol Subtest

## Directions

1. Consult manual for administration directions 4. Stop timing after 120 "; record completion time
2. Circle numbers identified correctly in the correct response grid
3. If all items are correct, add bonus pts.
4. Put line through numbers incorrectly identified in response grid
5. Sum number correct and bonus pts; record as raw score

## Correct Responses:

Bonus Points

| Completed in: | $100 "-109 "$ | $90 "-99 "$ | $80 "-89 "$ | $1 "-79 "$ |
| :--- | :---: | :---: | :---: | :---: |
| Bonus Points: | 1 | 2 | 3 | 4 |

Number Correct: $\qquad$ Number Incorrect: $\qquad$

Time Completed: $\qquad$ Bonus Points: $\qquad$

Digit Symbol Raw Score:
Max Score= 44 $\square$

## Optional Incidental Memory Score

Number Correct: $\qquad$ Number Incorrect: $\qquad$

## II. Block Design Subtest

## Directions

1. Consult manual for administration directions
2. Indicate if able to form correct design ("Y") or not ("N")
3. Record time taken to complete design
4. Record points awarded in Score column, based on time
5. Sum Score column; record as raw score

## Bonus Points

| Completed in: | $61 "-180 "$ | $31^{\prime \prime}-60^{\prime \prime}$ | $0 "-30^{\prime \prime}$ |
| :--- | :---: | :---: | :---: |
| Points: | 1 | 2 | 3 |

Block Design Raw Score:
Max Score = 21 $\square$

## III. Object Assembly Subtest

## Directions

1. Consult manual for administration directions
2. Circle the points awarded, based on the number of correctly assembled components for each object
3. Circle correct number of Time Bonus Points, if all items are correct
4. Sum Total Points; record as Object Summed Scores
5. Sum Object Summed Scores and record as Object Assembly Raw Score

| Pieces fit together in <br> time limit | Doll | Block | Hand | Ball |
| :---: | :---: | :---: | :---: | :---: |
| 2 | 1 | 2 | 1 | 2 |
| 3 | 2 | 3 | 2 | 3 |
| 4 | 3 | 4 | 4 | 4 |
| 5 | 4 |  | 5 | 5 |
| 6 | 1 |  |  |  |
| Time Bonus Points |  |  | 2 | 1 |
| $61^{\prime \prime}-120 "$ | 2 |  |  | 2 |
| $31 "-60 "$ | 3 |  |  |  |
| 0"-30" |  |  |  |  |
| Object Summed Scores |  |  |  |  |

Object Assembly Raw Score:
Max Score = 28 $\square$

## IV. Pattern Board Subtest

## Directions

1. Consult manual for administration directions.
2. Indicate if design was correctly constructed with $\mathrm{Y} / \mathrm{N}$ under Reproduction.
3. Circle the correct number of points to award if correctly completed, based on time limits.
4. Sum Total Points; record as Pattern Board Raw Score.

## IV. Pattern Board Subtest page 2

Pattern Board Raw Score:
Max Score = 22

## Date/Time:

TOTAL SCORE (MAX=55)

THIS TEST IS DESIGNED TO BE GIVEN ORALLY. The test subject is not allowed to write down the problems or to use a calculator or abacus. Writing "in the air" with his or her finger is permitted as is counting on fingers. Any test item can be repeated if the subject needs that with the exception of items in the "Accuracy" section - do not repeat them. Items are to be repeated only in their entirety. None of the items are to be timed; but if a subject is taking excessive time on an item, the examiner should move on.

Correct responses are indicated in the "Correct Answer" column. Each question should be given one point if correct, and zero points if incorrect and recorded in the "Score" column for each question. Sum the points for each SECTION and record in the SUBTOTAL row for each section. Sum the SUBTOTALs for all SECTIONS and record in the TOTAL SCORE line at the top of this record form.

| Information Section | Correct Answer | Score (0/1) |
| :---: | :---: | :---: |
| 1) $4.4 \pm \square$ | $\cdots$ |  |
| 2) $\triangle=\leq \sim$ |  |  |
| 3) |  |  |
|  |  |  |
| Information Subtotal (/4) |  |  |
| Decimals Section <br> (Read as digits, not numbers; such as $4.28=$ four point two eight, or $923=$ nine, two, three) Read "Which is greater?" for each item | Correct Answer | Score (0/1) |
| 5) $\quad 4.4$ | - |  |
| 6) $\square=\square$ | , |  |
| 7) |  |  |
| 8) |  |  |
| Decimals Subtotal (/4) |  |  |
| Accuracy Section <br> Read "I am going to read you a pair of number or letter series. You are to say if the pair is the same or different. For example, ' $7-3-7$ ' and ' $7-3-7$ ' would be the same, and ' $A-B-C$ ' and ' $C-B-A$ ' would be different. Any questions? Are these pairs the same, or different?" (read pairs) | Correct Answer | Score (0/1) |
|  | $\square 1$ |  |
| 10) |  |  |
| 11) 12) $_{\text {1) }}$ | $\pm$ |  |
| 12) |  |  |
| 13) |  |  |
| 14) |  |  |
| Accuracy Subtotal (/6) |  |  |

## Pattern of Search Scoring Guide

## To Accompany "Neuropsychological Assessment of Adults with Visual Impairment"

by John T. Gallagher \& Katherine A. Burnham

Examinee:

## Highest Grade Completed

## Examiner:

Examinee Age:

## Date/Time:

INSTRUCTIONS FOR THE EXAMINER: Administer the Pattern of Search Test to the examinee, according to directions given in the Appendix of the Neuropsychological Assessment of Adults with Visual-impairment. Record the following in each of the columns. For Thoroughness Score, record extensiveness of the search ( $0-5$, as an integer) within each cell, based on criteria given in the Appendix in the Manual.

Sum the numbers recorded for rectangles 1-12, and record this sum as Thoroughness Score Sum Total.
Under Plan Score, circle the Score for search quality, based on criteria in the manual. Circle the Points that correspond to that Score. Sum the total score for Thoroughness and the points for Plan Score and record for Total Score.
Record behavioral information based on criteria in Behavioral Checklist.

## Thoroughness Score

| 1 | 2 | 3 |
| :--- | :--- | :--- |
| 4 | 5 | 6 |
| 7 | 8 | 9 |
| 10 | 11 | 12 |

Thoroughness Score Sum Total: $\qquad$
Plan Score

| Points | 0 | 6 | 12 | 18 | 24 | 30 | 36 | 42 | 48 | 54 | 60 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Score | 0 | .5 | 1.0 | 1.5 | 2.0 | 2.5 | 3 | 3.5 | 4 | 4.5 | 5 |

Total Score= (Plan + Thoroughness): $\qquad$ (total possible: 120)
